Community rallies together to help in a clean-up:

The Aloes landfill site in Port Elizabeth is closest to Motherwell's Ward 59 . Both the community and the company have realised the importance of establishing and maintaining harmonious relationships and working together.

Recently, members of the community through the Ward Councillor, Cllr Dano, approached EnviroServ and requested assistance with cleaning up a section of the ward. Illegal dumping is a serious challenge in Motherwell, and as a company that cares about the environment, we were only too happy to assist on this occasion.

The illegal dumping site

The clean-up would not have been possible without the Eastern Cape management and staff who took part in this clean up. You continue to fly the EnviroServ flag high and are true ambassadors for this organisation that we all love.

Councillor Dano has written to the company , expressing his gratitude for the clean-up, especially as the area which was cleaned up is adjacent to Mr. Galo's home; Mr. Galo is a former Robben Island political prisoner who passed away over the weekend.
